

Profit while promoting good health!

See it, Smell it, Taste it, Sell it!

The JM-20 Standard will pull your customers in while they watch oranges, lemons, and limes being pressed, providing them the freshest squeezed juice available.

Simply fill the indexing ramp with your fruit (it will hold between 5-7 pieces), and they will automatically be indexed in by gravity to the feeding head. This juicer will process at 20 fruit per minute. You can expect 270-280 oz. yield per case.

For easy storage the JM-20 Standard features a hopper capable of holding a 40 lb. case of fruit!

Placement Options

The JM-20 Standard is pictured right as a counter top model, with a through the counter option to entice your customers for an impulse buy. It will enhance your fresh image, as well as your profits!

Once they smell the aroma of fresh citrus and see the fruit being freshly squeezed through the machine, their mouths will water.

When purchased with the stainless steel cart the JM-20 Standard can be placed on the retail floor, or in a back room for operation.

Invest in Quality

The JM-20 AF is assembled in sunny Jupiter, Florida with US electric wiring specifications, an American Dayton ½ horsepower motor, and steel gears. The machine carries a 1 year warranty, with a 2 year warranty on the American made motor.

JuiceMatic JM-20 Standard Commercial Juicer
