

Fresh'n Squeeze 3300

The Gold Standard in
Orange Juice

Brought to you by
JBT Marel

Built for operations that demand more

You're running a high-volume juice program where consistency, speed, and reliability matter. **The Fresh'n Squeeze 3300** delivers on all three.

Powered by whole fruit extraction technology, the 3300 produces more juice per fruit while protecting fresh citrus flavor. With a larger touchscreen interface, improved motor efficiency, and smarter controls, it's designed to keep your operation running smoothly from open to close.

More juice from every fruit

The Fresh'n Squeeze 3300 extracts up to 50% more juice per fruit compared to traditional cut-and-press juicers. That means fewer cases of fruit, less waste, and stronger margins across your juice program.

Fresh taste your customers expect

Clean, bright citrus flavor in every pour. The whole fruit extraction process separates juice from peel and seeds instantly, helping protect taste while minimizing bitterness and peel oil.

Designed for continuous, high-output operations

With throughput up to 90oz of juice per minute and a floor-standing design, the 3300 is purpose-built for grocery retailers, wholesale clubs, and central production environments. It's ready for long production runs without compromise.

Modern controls. Simple operation.

A larger touchscreen HMI and intuitive interface make training and daily operation straightforward. Reverse functionality and smart controls help keep juice flowing and reduce interruptions during operation.

Easy to clean. Easy to maintain.

A simple cleaning process with minimal parts helps reduce labor time and keeps sanitation routines consistent. Your team spends less time cleaning and more time producing.

Built to last

Constructed from stainless steel and designed for demanding environments, the 3300 delivers reliable performance day after day. NSF and UL listings support food safety requirements, while JBT Marel's global service network ensures long-term support.

TECHNICAL FEATURES

PRODUCT SPECIFICATIONS

Juice yield	Processes up to 93 ounces per minute (0.73 gal/min)
Throughput	33 fruit per minutes
Fruit size range	2-1/2" (63.5 mm) to 3-7/8" (98 mm)
Hopper capacity	2 cases
Dimensions	25.7" (65 cm) W x 36.7" (93 cm) D x 65.4" (166 cm) H
Weight	750 lbs
Cleaning	8 removable parts, hose-down and dishwasher safe
Certifications	CE, NSF, UL
Warranty	1 Year
Electrical requirements	1.5 HP (1.1 kW), 110/220 V, 60/50 Hz, 20/10 A, single phase

Premium juice

✦ reduced waste

✦ unmatched endurance
